DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01 March 2007 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-4, 6, 7 and 17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly-claimed aspect

Art Unit: 1732

of "wherein the solidifiable fluid comprises a binding material" (claim 1, line 6) is new matter for these claims because this aspect is described for biocompatible coatings (paragraph [0049] of the published application, or paragraph [0045] of the specification; note that claims 8-10 and 12 are proper) and for a divider wall (paragraph [0062] of the published application, or paragraph [0057] of the specification; note that claims 13-15 are proper).

4. Claims 19, 22, 23 and 34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly-claimed aspect of "wherein the solidifiable fluid comprises dissolvable nanoparticles" (claim 19, line 5) is new matter for these claims because this aspect is described for a divider wall (paragraph [0063] of the published application, or paragraph [0058] of the specification; note that claims 24 and 25 are proper).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-4, 6-10, 12-15 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Beebe et al (U.S. Patent 6,488,872 B1).

Beebe et al (see the entire document, in particular, col. 3, lines 44-55; col. 4, lines 52-61; col. 7, line 55 to col. 8, line 7; col. 8, line 66 to col. 9, line 35; col. 10, line 5 to col. 12, line 52; col. 28, lines 36-63; claims 1, 9 and 10) teaches a process of making a structure as claimed, including a solidifiable fluid which contains a binding material.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1732

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 19, 22-25 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beebe et al (U.S. Patent 6,488,872 B1) as applied to claims 1-4, 6-10, 12-15 and 17 above, and further in view of Schneider et al (U.S. Patent Application Publication 2003/0083401 A1).

Schneider et al (see the entire document, in particular, paragraph [0055]) teaches a process of making a structure including the use of a solidifiable fluid containing nanoparticles, and such would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of Beebe et al in view of Schneider et al principally in order to manufacture a structure having improved properties from the use of nanoparticles.

Response to Arguments

9. Applicant's arguments with respect to claims 1-4, 6-10, 12-15, 17, 19, 22-25, and 34 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1732

10. With respect to a solidifiable fluid which contains a binding material, this is taught by Beebe et al (see, for example, col. 28, lines 36-63 of Beebe et al).
